Training Manual for Droidcam App usage

Dev47Apps

Windows

Install Notes

Quit all chat programs to ensure a clean install and avoid reboots.

After installation, re-open chat programs (Skype, MS Teams, Zoom, ..), and these should recognize "DroidCam" as a webcam. You can also select DroidCam as a microphone.

By default, 'DroidCam Source 2' will output a light blue screen and 'Source 3' will output an orange screen. The two video sources are there for better compatibility, you can use whichever one works.

Next: Connect the client and phone app >
