INSAT-3DS: India's Meteorological Marvel

Dr. Manish Mohan Gore

Weather and climate profoundly influence various aspects of human life, extending beyond agriculture, where the successful cultivation of food grains and crops depends on prevailing weather conditions. Weather, and climate also significantly impact healthcare, influencing the spread of diseases and posing health risks. Inclement conditions can damage infrastructure like roads and buildings, disrupting economies. Additionally, climate and weather patterns play a crucial role in energy production and consumption, affecting energy demand and efficiency. Water resources face challenges as climate changes, impacting agriculture, industry and domestic use. The economy is vulnerable to weather-related events, affecting agriculture, insurance costs and overall productivity. Biodiversity is at risk as ecosystems are disrupted by climate change, threatening plant and animal species. Changing climate conditions also influence human migration patterns, prompting movement in response to environmental shifts like rising sea levels and extreme weather events. A comprehensive understanding of these wide-ranging effects is essential for developing strategies to mitigate their

negative impacts across diverse sectors.

Technology plays a pivotal role in monitoring and understanding both weather and climate, enabling us to anticipate changes in meteorological phenomena. Notably, the India Meteorological Department (IMD) and the Indian Space Research Organisation (ISRO) stand as crucial contributors in our country's efforts to serve humanity through the measurement and prediction

of weather and climate conditions.

A milestone in this pursuit occurred on February 17, 2024, with the launch of India's advanced weather satellite GSLV-F14/INSAT-3DS. This third-generation meteorological satellite, a key component of ISRO's endeavours, is designed for sophisticated meteorological observations. Its successful journey into space marks a significant stride in the scientific progress of the Indian region, promising

enhanced capabilities in weather forecasting. Equipped with state-of-the-art payload including 6-channel imager and 19-channel sounder, INSAT-3DS satellite will ensure top-class meteorological data collection. The primary objective of this special meteorological satellite INSAT-3DS is to provide continuity of services to the existing in-orbit INSAT-3D (launched in 2013) and 3DR (launched in 2016) and significantly enhance the capabilities of the INSAT system.

Mission Details

On 17 February 2024, at 5:35 PM, the GSLV-F14/INSAT-3DS mission soared into space from the Satish Dhawan Space Center in Sriharikota, Andhra Pradesh. The GSLV-F14 vehicle, measuring 51.7 meters in length and 4 meters in width, efficiently carried the 2275 kg INSAT-3DS satellite into a geosynchronous orbit before transferring it to a stationary position in space. This mission marks the 16th flight of GSLV and the 10th with an indigenous Cryo stage.

Key Goals of INSAT-3DS Satellite

The INSAT-3DS satellite is designed with a set of primary objectives aimed at comprehensive Earth observation and

India's Expanding Space Sector Offers Stellar Career Opportunities

Prateek Singh

Remember the awe-inspiring tales of Rakesh Sharma and Kalpana Chawla that fueled your childhood dreams of soaring amidst the stars? Did the ground breaking moments of Chandrayaan-3 and Aditya-L1 had you literally jumping out of your seat in excitement?

India's space programme has captured the world's attention with its groundbreaking achievements in 2023. The successful Chandrayaan-3 lunar landing on the Moon's Southern hemisphere, achieved with a modest budget of \$75 million, has set the stage for a new era in space exploration.

The announcement of the Chandrayaan-4 mission, with its ambitious goal to land on the far side of the Moon and bring back lunar samples, marks a testament to India's unwavering commitment to pushing the boundaries of space exploration. Simultaneously, the Aditya-L1 mission, destined for the Earth-Sun Lagrange point 1 to unravel

the mysteries of the Sun's corona, adds another dimension to India's space prowess.

As the nation rallies behind these visions and ambitions, the need for professionals to make them come true will only intensify in the coming days. The question is, are you ready to join the cosmic expedition and carve your path among the stars?

Education in Space Science and Related Fields

Now, you may wonder about the qualifications needed to journey into this career. Whether

mathematics or related fields. The Indian Space Research Organisation (ISRO) and other space organisations, including startups offer recruitment programmes, internships and research opportunities, providing a launching pad for aspiring space enthusiasts. The cosmic stage is set and the invitation to explore is beckoning-how will you respond to the call of the stars?

Embarking on a career in the space sector is an exciting and challenging journey that requires dedication and a strong academic foundation. Here are the essential steps you should consider:

High School Education: Take math, physics and chemistry as core subjects in high school. These subjects lay the

INSAT-3DS: India's Meteorological Marvel

meteorological services:

1. Surface Monitoring and Ocean Observation: The satellite's first objective is to diligently monitor the Earth's

surface and observe the oceans, employing various spectral channels crucial for meteorological analysis.

2. Vertical Profiling of Atmosphere: INSAT-3DS is tasked with providing detailed vertical profiles of diverse meteorological parameters within the atmosphere, contributing to a thorough understanding of atmospheric conditions.

3. Data Collection and Dissemination: A pivotal role of the satellite is to facilitate the collection and dissemination of data through dedicated data collection platforms, ensuring efficient and timely access to vital information.

4. Satellite-Aided Search and Rescue Services: INSAT-3DS is equipped to offer satellite-aided search and rescue services,

demonstrating its commitment to enhancing safety and response capabilities in emergency situations.

Advanced Capabilities of INSAT-3DS

The INSAT-3DS is purposefully crafted for sophisticated meteorological observations, elevating weather forecasting precision. Housing cutting-edge technology, the satellite boasts a 6-channel imager and a 19-channel sounder dedicated to meteorological research, ensuring the acquisition of high-quality data. Essential communication payloads, such as the Data Relay Transponder (DRT), play a crucial role by receiving data from automated collection platforms and weather stations, thereby augmenting weather forecasting capabilities.

A key component, the SAS&R transponder, contributes significantly to distress signal detection and warning reception from beacon transmitters, actively participating in global search and rescue services. With its advanced payload and robust communication features, INSAT-3DS is adept at monitoring both land and ocean surfaces, providing vital data for disaster warning systems and bolstering early-warning capabilities.

In a remarkable start to the year 2024, ISRO Chairman Shri S. Somanath unveiled an ambitious agenda, targeting a minimum of 12 launches. Demonstrating this

commitment, ISRO achieved the successful launch of the X-ray Polarimeter Satellite (XPoSat) on January 1, marking the beginning of the year. Further solidifying its accomplishments, on January 6, ISRO flawlessly positioned India's inaugural space-based solar observatory, the Aditya-L1 satellite, launched on September 2 the previous year, into its designated orbit at Earth-Sun Lagrange point 1.

Benefits of INSAT-3DS Data

As per information from the Ministry of Earth Sciences, Government of India, the meteorological data obtained from INSAT-3DS will be used by the India Meteorological Department (IMD). The data will also be collected by laboratories working under the Ministry of Earth Sciences such as National Centre for Medium Range Weather Forecasting (NCMRWF), Indian Institute of Tropical Meteorology (IITM), National Institute of Ocean Technology (NIOT) and Indian National Centre for Ocean Information Services (INCOIS). They will use the data for weather related research and services.

The data obtained from this satellite will mainly be used to obtain information about India's weather and climate forecast. Apart from this, the data from this satellite will also prove helpful in issuing timely warnings and advance information and advisories to the general public, fishermen and farmers.

INSAT-3DS Payloads

Imager Payload

Imager Payload: INSAT-3DS satellite carries a multi-spectral imager which is called the optical radiometer. This equipment is capable of generating images of the Earth and its environment in six wavelength bands.

Sounder Payload

Sounder Payload: INSAT-3DS satellite is carrying 19 channel sounder payload. This has one visible channel and 18 narrow spectral channels. Sounder payload will provide the information on the vertical profiles of the atmosphere such as temperature, humidity etc.

Data Relay Transponder (DRT): This payload of INSAT-3DS receives global meteorological, hydrological and oceanographic data from automatic Data collection platforms and Automatic Weather Stations (AWS) from multi-user and relays back to user terminal.

Satellite Aided Search and Rescue (SAS&R) Transponder: The SAS&R Transponder relays a distress signal or alert detection from the beacon transmitters for search and rescue purposes with global receive coverage in UHF band.

As per ISRO, the payloads of INSAT-3DS will generate major geophysical parameters such as Atmospheric Motion Vector (AMV), Sea and Land Surface temperatures (SST, LST), Cloud properties & microphysical parameters, Fog, Rainfall, Snow Cover, Snow Depth, Fire, Smoke, Aerosol, Water Vapour Wnd (WWW), Upper Tropospheric Humidity (UTH), humidity profile and total ozone etc. to study about atmosphere, land and ocean. Subsequently, data products are generated catering to varied range of applications.

Conclusion

The benefits derived from the data acquired through INSAT-3DS will be crucial for advancing meteorological research and services. The primary recipient of this valuable meteorological data is the India Meteorological Department (IMD). Additionally, laboratories operating under the Ministry of Earth Sciences, such as the National Centre for Medium Range Weather Forecasting (NCMRWF), Indian Institute of Tropical Meteorology (IITM), National Institute of Ocean Technology (NIOT) and Indian National Centre for Ocean Information Services (INCOIS), will leverage this data for weather-related research and services. Beyond this, the information

derived from INSAT-3DS will play a pivotal role in issuing timely warnings, as well as providing advance information and advisories to the general public, fishermen and farmers. In essence, the data collected from INSAT-3DS is poised to significantly enhance our ability to monitor, understand and communicate critical meteorological information for the benefit of various sectors and the public at large.

India's Legacy of Meteorological Wisdom

India boasts a profound legacy of meteorological observations and weather prediction, dating back to ancient times. The classic work "Bhatsamhita," authored by Varahamihira around 500 AD, stands as evidence of the extensive knowledge and understanding of atmospheric processes during that era. The text emphasises the importance of adequate rainfall for agricultural prosperity. Another ancient masterpiece, "Arthashastra" by Kautilya, meticulously documents scientific rainfall measurements and their applications in revenue and relief efforts. Even the revered poet Kalidasa, in the seventh century, referenced the monsoon's onset and path over central India in his epic "Meghadoot."

The formal establishment of meteorology as a scientific discipline occurred in the 17th century, marked by the invention of the thermometer and barometer, alongside the formulation of laws governing atmospheric gases. India has been home to some of the world's oldest meteorological observatories. The British East India Company founded such facilities in Calcutta and Madras to study the nation's weather and climate. The Asiatic Society of Bengal, founded in 1784 in Calcutta (now Kolkata), played a crucial role in advancing scientific studies in Indian meteorology.

In response to the calamitous tropical cyclone of 1864 in Calcutta and subsequent monsoon failures, the Indian Government established the India Meteorological Department (IMD) in 1875. Initially headquartered in Calcutta, IMD later moved to Shimla, Poona (now Pune), and finally to New Delhi. Since its inception, IMD has continually advanced its infrastructure for meteorological observations, communications, forecasting, and weather services, utilising contemporary technology.

During the telegraph era, IMD pioneered the use of weather telegrams for collecting observational data and disseminating warnings. As technology evolved, IMD became the first organisation in India to employ a message-switching computer for global data exchange in the computer age.

Further contributing to relentless weather monitoring and forecasting, the Indian Space Research Organisation (ISRO) has played a pivotal role. Leveraging ISRO's research and development prowess, India became the first developing country to have its own geostationary satellite (INSAT), primarily designed for weather monitoring and cyclone warnings. This historical continuum reflects India's commitment to advancing meteorological sciences with a blend of ancient wisdom and modern technological innovation.

Coal India Limited (CIL), a 'Maharatna' Company is a prominent player in the global energy landscape with operations spanning across eight states of the country. During the year 2022-23, CIL produced 703 Million tons of coal, which is approximately 79% of India's total coal production. This resulted in profit of Rs.28124 Crores (after Tax). CIL is also diversifying and expanding to other verticals such as solar power, thermal power, fertiliser, surface coal gasification, coal bed methane, critical minerals etc., which will ensure greater value addition; and thereby, improving operational and financial performance for the long-term in a sustainable manner.

With a manpower of around 230000, CIL is one of the largest employer and it strive to make medical care accessible to all employees and its stake holders. To ensure access to healthcare, it has strong network of 70 fully equipped Hospitals with 4362 Beds, 366 Dispensaries, 364 Ambulance. To further strengthen these facilities CIL is looking for young energetic doctors who are ready to work in challenging environment of CIL.

Persons with Disabilities belonging to any reserved category for which the post is identified (as indicated in Table 1-B above) can also apply even if no vacancies are specifically reserved for them. Such candidates will be considered for selection for appointment to the post by general standard of merit in the respective category i.e., GEN/EWS/OBC (NCL)/SC/ST.

For posts reserved for PwBD (as per Table 1-C), Candidates belonging to any category (i.e. GEN/EWS/OBC/NCL/SC/ST) with relevant benchmark disability, identified for the reserved PwBD post can apply.

PwBD candidates applying against a vacancy specifically reserved for them shall be eligible for the benefit of reservation/concessions, if impairment is not less than 40% of the relevant disability.

Note: Reservation for Persons with Benchmark Disability (PwBD) vacancies is Horizontal.

CATEGORY ABBREVIATIONS USED: B=Blind, LV=Low Vision, D=Deaf, HH=Hard of Hearing, OA=One Arm, OL=One Leg, BA=Both Arms, BL=Both Leg, OAL=One Arm and One Leg, BLOA=Both leg & one arm, BLA=Both Legs Arms, CP=Cerebral Palsy, LG=Leptosy Cured, Dw=Dwarfism, AAV=Acid Attack Victims, MDy=Muscular Dystrophy, ASD=Autism Spectrum Disorder (M=Mild, MoD=Moderate), ID=Intellectual Disability, SLD=Specific Learning Disability, MI=Mental illness, MD=Multiple Disabilities, Spinal Deformity (SD)/ Spinal Injury(SI) without any associated neurological/limb dysfunction or Spinal Deformity (SD)/ Spinal Injury(SI) with associated limb dysfunction.

COMPENSATION PACKAGE:

The company offers attractive compensation package comprising Basic Pay, Dearness Allowance, HRA, Cafeteria Allowance, Performance Related Pay (PRP), Medical Facility, Social Security Benefits including PF, Pension, and Gratuity etc as per company rules in force from time to time. Selected candidates will be placed in the pay scale of ₹ 50,000-3%-1,60,000 (IDA) (E2) during one year training period. On successful completion of training, the candidates will be absorbed as Engineer/Officer in the same scale with probation of one year. The total annual emoluments for the new joiner shall be approx. Rs. 15 Lakh.

PLACEMENT:

Candidates will be placed at Projects / Power Stations/ Offices including Joint Ventures & Subsidiary Companies of NHPC in various parts of the country or abroad.

SELECTION PROCESS:

- The Selection Process consists of normalized marks obtained (out of 100) in the corresponding paper of GATE 2023, Group Discussion & Personal Interview.
- Eligible candidates should have qualified and secured a valid score in the corresponding paper of GATE 2023.
- Candidates shall be short-listed for Group Discussion & Personal Interview based on their normalized Marks out of 100 in the corresponding paper of GATE-2023 only and as per the criteria decided by the Management (not more than 05 times of vacancy).
- Candidates shortlisted for the Group Discussion and Personal Interview shall be required to submit a consent form for appearing in GD/ Personal Interview as per the notified schedule. Non submission of consent form and non-appearing in GD/PI will lead to cancellation of his/her candidature. Also, the shortlisted candidates will be required to bring the documents as mentioned in their GD/PI call letter.
- Weightage to Different Parameters for Selection for empanelment: For calculation of final score of a candidate for empanelment, the weightages of marks obtained in GATE 2023, Personal Interview and Group Discussion is as under:

Parameters	Weightage
GATE 2023 Marks (out of 100)	75%
Combined score of Group Discussion & Personal Interview	25%

There will be no cut off or qualifying marks for Group Discussion.

Candidates shortlisted for GD and Personal Interview may have to also undergo online/ offline Psychometric Assessment, result of which will be used as an input during the interview.

Candidates shall be considered for empanelment if they obtained the qualifying percentage as mentioned below.

Category	Combined Score of P.I & G.D.
UR / EWS / OBC (NCL) Candidates	40%
SC / ST / PwBD Candidates	30% (Depending on reservation of vacancies only)

- Candidates who qualify in the combined score of Personal Interview and Group Discussion will only be adjudged suitable for empanelment. Therefore, it is again reiterated that candidates should have qualified in GATE 2023 and in the combined score of Personal Interview and Group Discussion in order to be considered eligible for empanelment. Please note that only GATE 2023 score (Normalized Marks out of 100) is valid for this recruitment process, GATE score of any other year is not valid.
- The candidates will submit their preference order (1st and 2nd preference) of company from NHPC and NHDC at the time of applying for the post of TE (Civil) and TE/TO(IT).
- A panel for the post of TE (Civil) and TE/TO(IT) shall be done on the basis of total vacancies and not separately for NHPC & NHDC. Operation of panel shall be done on the basis of option / preference exercised by the candidate at the time of applying.
- For the post of TE (Civil) and TE/TO(IT), once a candidate gets offer from either NHPC or NHDC, based on his first or second preference, on the basis of available vacancies, her/his candidature for other organization may automatically be treated as cancelled, even if she/he declines the offer/ does not join the organization. The Offer is issued to the candidate for NHPC or NHDC (as applicable), on the basis of number of vacancies and rank in overall merit. The offer issued shall be withdrawn and cancelled in case the candidate does not wish to join NHPC or NHDC (as applicable) or decline the offer. No request for change of company/ organization shall be entertained.
- Securing the minimum total qualifying marks for respective categories enumerated in the selection criteria does not confer any right or claim by the candidates for consideration for final selection, as the same is related to number of positions, reservation position, relative composite merit applicable for each category, candidates meeting the notified eligibility criteria/other parameters, documents found in order upon verification and other conditions specified in the advertisement.
- In case more than one candidate secures the same mark, the candidate with older date of birth (elder in age) shall be considered for deciding place in the merit list.
- The offer of appointment shall be issued to the suitable candidates in the order of category wise merit and based on the requirement. Selected candidates shall be notified through their registered Email.

India's Expanding Space Sector Offers Stellar ...

foundation for understanding the complexities of space science. Develop a solid understanding of mathematical principles, the forces governing the universe and material composition in space.

Bachelor's Degree: Pursue a bachelor's degree in engineering or science. Several majors align with space science, including aerospace engineering, mechanical engineering, electrical engineering, computer science, physics and astronomy. Choose a field that aligns with your interests and passion within space science.

ISRO Centralised Recruitment Board (ICRB) Exam: Prepare for and take the ISRO Centralised Recruitment Board (ICRB) exam. This competitive exam, held annually, evaluates your knowledge of math, science and engineering. Successfully passing this exam makes you eligible and equipped for job opportunities not only within ISRO but the entire space sector.

Join ISRO's Research Brigade: Apply for a position as a Junior Research Fellow at ISRO. This role provides valuable hands-on experience in space science research under the guidance of seasoned scientists. It's an excellent opportunity to apply your academic knowledge to real-world projects.

Advanced Education (Master's or Ph.D.): Pursue a master's or Ph.D. degree in a related field. This advanced education will equip you with specialised knowledge and skills crucial for a successful career in space science. Consider focusing on areas such as astrophysics, planetary science, or spacecraft engineering to tailor your expertise.

Top Indian Institutes Offering Space Education

Space education goes beyond regular classrooms, making learning exciting and hands-on. In today's tech-driven world, space education teaches skills like problem-solving, innovation, teamwork and adaptability—crucial for modern jobs. It's not just about space; it opens doors to various careers like oceanography, geology, space tourism and more. Plus, it helps students see Earth's fragility and why global cooperation in space is crucial.

- Indian Institute of Space Science and Technology:** IIST is Asia's first Space University, founded in 2007 in Thiruvananthapuram. Offering programmes ranging from undergraduate to post-doctoral levels, IIST is equipped with a faculty of nearly 100, spread across seven departments. IIST operates as a residential institution located in Valiamala, approximately 20 km from Thiruvananthapuram city. The institute serves as a focal point for cutting-edge

research and development in the field of space studies, contributing insights and directions for the Indian Space Programme. IIST provides a range of programmes, including undergraduate, post-graduate, Ph.D. and dual-degree offerings across seven departments: Aerospace Engineering, Avionics, Chemistry, Earth & Space Sciences, Humanities, Mathematics and Physics. In addition to traditional degrees, the institution offers dual degrees (B.Tech + M.Tech.) and doctoral-level programmes. PG programmes are available in both regular and sponsored modes.

- Indian Institute of Remote Sensing:** IIRS, situated in Dehradun, is a premier institute dedicated to capacity building in Remote Sensing and Geo-informatics. As an affiliate of the United Nations, it hosts the Centre for Space Science and Technology Education in Asia and the Pacific (CSSTE-AP). Offering postgraduate education and training programmes, IIRS caters to diverse target groups, including professionals, fresh graduates, researchers, academia and decision-makers. The courses, ranging from one week to two years, cover M.Tech., M.Sc. and PG-Diploma.

- Aryabhata Research Institute of Observational Sciences:** ARIES, nestled in Nainital, specialises in Astronomy, Astrophysics and Atmospheric Sciences. It is an autonomous body under the Department of Science and Technology, Government of India. The Institute's astronomical observatory opens its doors to the public during working days, offering a unique opportunity for daytime exploration and fixed moonlit nights for night viewing.

- Indian Institute of Astrophysics:** Based in Bengaluru, IIA is a premier National Research Institute focusing on astronomy, astrophysics and related subjects. It boasts a network of laboratories and observatories across India, contributing significantly to Astrosat, India's first dedicated multi-wavelength space observatory.

- Indian Institute of Space Education and Research:** Established in 2006 across five locations, IISERs (Kolkata, Pune, Mohali, Bhopal and Thiruvananthapuram) are autonomous institutions offering Masters and Doctoral degrees. Emphasising research, students engage in projects during vacation periods, fostering practical learning.

- Indian Institute of Science:** IISc in Bengaluru is renowned for scientific research and higher education. It gained Deemed University status in 1958 and holds top rankings

worldwide. IISc offers a diverse range of programmes and has been a trailblazer in space-related research.

- Inter-University Centre for Astronomy and Astrophysics:** IUCAA, an autonomous institution under the University Grants Commission, promotes active groups in astronomy and astrophysics in Indian universities. Located in Pune, it collaborates with the National Centre for Radio Astrophysics, operating the Giant Metrewave Radio Telescope.

- National Centre for Radio Astronomy:** Situated in the Pune University Campus, NCRA is a premier research institution in radio astronomy. As part of the Tata Institute of Fundamental Research, it engages in diverse studies, from the Sun to cosmology, offering opportunities in radio astronomy and radio instrumentation.

- Physical Research Laboratory:** Situated in Ahmedabad, PRL, known as the cradle of space sciences in India, is a National Research Institute supported by the Department of Space. Established in 1947, it focuses on space and allied sciences, managing the Udaipur Solar Observatory and contributing significantly to cosmic ray research.

- Radio Astronomy Centre:** A part of the National Centre for Radio Astrophysics, RAC in Ooty is nestled in the Nilgiri Hills. It is renowned for front-line research in radio astronomy and astrophysics, providing a stimulating environment and boasting highly qualified staff.

- Raman Research Institute:** Founded by Nobel laureate C. V. Raman, RRI is located in Bengaluru. Initially privately owned, it is now government-funded, engaging in scientific research and carrying forward the legacy of its illustrious founder.

Admissions to these institutes are merit-based, adhering strictly to government reservation policies. They consider scores in national-level entrance exams such as JEE Main, JEE Advanced, GATE, etc.

ISRO-Academia Connect

ISRO actively promotes collaboration with academic institutions for research endeavours. Interested entities can engage with ISRO centers for joint research activities in focused areas. Two primary modes of engagement include:

- Sponsored Research:** ISRO identifies specific research areas in space and invites proposals from qualified academic institutions.

- ISRO Cells:** ISRO has established cells in premier engineering institutions to facilitate joint research. Space Technology Cells (STC) at IITs and IISc focus on advanced research, Space Technology Innovation Centres (STIC) at NITs emphasise entrepreneurial projects and

Regional Academic Centers for Space (RAC-S) at NITs encourage collaborative regional space projects. Additionally, various centers of excellence, innovation centers and space science centers are instituted to boost space research.

Furthermore, recognising the importance of a widespread academic interface, ISRO has initiated several capacity-building programmes to enhance academia's involvement in ISRO programmes. These initiatives encompass Sponsored Research (RESPOND), Regional Academic Centers for Space (RAC-S), Space Technology Incubation Centres (S-TICs), Space Technology Cells (STC), Space Innovation Centre, ISRO Chairs, Centre of Excellence on Advanced Mechanics of Materials, Satish Dhawan Centre for Space Science and Centre for Nano Science & Engineering (CeNSE). Each programme is tailored to achieve specific objectives, such as fostering entrepreneurship among students (S-TIC), motivating academicians to tackle challenging problems (ISRO Chairs) and enhancing an institute's overall research aptitude in the space domain (RAC-S).

Career Opportunities in Space are as Vast as the Universe

If you thought of becoming an astronaut or space scientist was too far-fetched, think again. The space sector is not confined to the hot seats of the spacecraft; it's a vast universe teeming with diverse career prospects. The sector is fiercely competitive yet offers impactful roles as vast and intriguing as the cosmos itself. While the contributions of Satellite Engineers, Spacecraft Engineers, Ground Station Engineers, Remote Sensing Scientists, Astrophysicists and Space Data Analysts are pivotal, the space domain now encompasses a myriad of alternative vocational avenues as well. Technical Services Engineers, Aircraft and Avionics Technicians, Aerospace CNC Machinists, etc. are job roles that are as crucial and in demand. Even more general roles like electricians, accountants and administration managers find their place in this celestial realm.

Opportunities in the Fledgling Private Sector

India's space sector is poised for unprecedented growth, with a valuation of \$9.6 billion in 2020, contributing 2%-3% to the global space economy. Anticipated to reach \$13 billion by 2025, India aims to capture nearly 10% of the global space economy by 2030. The coming decade will significantly boost the space industry, driven by public-private partnerships, a thriving start-up ecosystem and increased private sector participation in space commercialisation and deep space explorations.

With over 400 industrial firms, ranging from large conglomerates to SMEs, currently

collaborating with ISRO, the Indian space sector is evolving rapidly. ISRO's agreements with four countries for launching foreign satellites, with potential revenue of \$141 million, showcase India's growing prowess in commercial space activities.

With a total investment of \$1.2 billion in the next five years, the NewSpace India Limited (NSIL), the exclusive public-sector aggregator, aims to boost industry participation and commercial activities in the space sector. Indian startups, once sparse in the space domain, have burgeoned to 189 in 2023, attracting a total funding of \$124.7 million. Space cooperative agreements with 61 countries and five multilateral bodies further exemplify India's global collaborative efforts.

Indian Space Policy 2023 policy emphasises the private sector's critical role in the entire value chain of the space economy. The new Foreign Direct Investment norms offer new avenues for investments and technological support. As private sector involvement intensifies, India's space sector not only promises exponential growth but also emerges as a key generator of employment opportunities, propelling the vast domain of space exploration into a new era of possibilities.

Opportunities in Civil Administrative Domain

2023 witnessed not just astronomical achievements but also a strategic repositioning of India's space policy. The space policy delineates a clear focus on developing and supporting the commercial space sector. The Department of Space, operating under the Prime Minister's Office, emerges as the policy-making and implementation nucleus, while the Indian Space Research Organisation (ISRO) dedicates itself to research and development. The NewSpace India Ltd (NSIL) takes center stage, tasked with commercialising space technologies and platforms generated through public expenditure. The Indian National Space Promotion and Authorisation Center (IN-SPACe) steps into the limelight as the singular window authorisation center for both public and private sector space endeavours. This streamlined approach is not only a testament to India's commitment to fostering innovation and collaboration in the space sector but also indicates the manpower requirement that will be needed to run these organisations while keeping up with the rapid expansion of the sector.

Opportunities in Defence Space Applications

It is not just the civil institutions that are evolving; the military dimension of India's space capabilities is also undergoing a transformative shift. In 2019, the Defence Space Agency and Defence Space Research Organisation were established, marking India's foray into creating its version of a space

Understanding Juice Jacking: A Cybersecurity Threat

EN EXPLAINS

Whether you're shuttling between home and work, navigating different cities, or embarking on a leisurely trip, your mobile phone is a constant companion. However, this apparently routine activity is not devoid of risks,

especially when relying on public USB charging points.

The Reserve Bank of India (RBI) recently issued a warning about the risks of "juice jacking," a cyber attack targeting mobile users charging their devices at public USB ports. This advisory highlights the increasing threat posed by cyber criminals in public spaces like airports, hotels and shopping centers, where unsuspecting users may connect their devices for a quick charge, unknowingly exposing themselves to potential data theft or malware infection.

Cybersecurity experts caution that malicious actors may discreetly introduce malware into these public charging ports. Upon connecting your device, this malware can be used to take control, pilfer personal information and extract passwords. Subsequently, malicious entities may exploit this acquired data to infiltrate online accounts or engage in unauthorised transactions.

What is Juice Jacking?

Cyber criminals are exploiting vulnerabilities in various ways, breaching internal security and often, citizens remain unaware of the threats looming over them. Juice Jacking is one emerging method gaining prominence in the series of cyber crimes.

Juice jacking is a form of cyber attack where hackers manipulate public USB charging ports, either infecting them with malware or making hardware changes to steal data from connected devices. Incidents of juice jacking have been reported in public places like airports, hotels and shopping centers, making it a growing concern for individuals.

This cyber threat is likened to the ATM card skimming exploits of the past, as both involve users depending on the

safety of the compromised hardware.

How Juice Jacking Works?

Juice jacking is made possible due to the inherent design of Universal Serial Bus (USB) technology. A single port serves a multitude of functions, allowing users to both charge or power a device and transfer data to and from it. If you recall the days when each peripheral required its own unique cord and port, you'll appreciate the increased convenience brought about by this unified approach. However, this convenience introduced a new vulnerability: unintended data exchange during power charging. Remember in the early 2000s, mobile phones automatically enabled both functions upon connection.

Phone manufacturers have since addressed this concern by incorporating a prompt that seeks user permission for data exchange. Both iOS and Android have updated their devices to warn users during charging, providing an option to trust or distrust the charging port, power bank, or charging process, further enhancing user security. This is exemplified by the "trust this device" message displayed when connecting a phone to a computer. Notably, if the phone is plugged into a power source alone, this message should not appear. Opting not to trust the device prevents data exchange while allowing the phone to charge. This iterative process aligns with the standard

procedure in technological advancements: identifying vulnerabilities prompts manufacturers or developers to devise effective solutions.

How Juice Jacking Harms?

- **Data Theft:** Users may not realise that sensitive information, such as passwords and contacts, has been stolen during a juice jacking attack.
- **Malware Installation:** Significant damage can occur.

travelling.

- Pack AC and car chargers, along with your personal USB cables.
- Carry an external battery (power bank) as a crucial backup power source.
- When connecting to a USB port, consider using a "charging-only" cable from a trusted supplier to prevent data transfer during charging.
- Prioritise choosing "charge

including manipulating the device, spying on the user, or stealing information.

- **Multi-device Attack:** Devices charged by infected cables can become carriers of viruses, infecting other cables and ports.

How to Prevent Juice Jacking?

To avoid falling prey to juice jacking, users can take several precautionary measures:

- Always use AC (Alternating Current) power outlets to minimise potential risks while

only" if prompted to select options like "share data," "trust this computer," or "charge only" for enhanced security.

- Avoid using chargers left plugged into public outlets.
- Ensure that mobile devices and software are regularly updated.
- Exercise caution by never accepting free promotional charging devices or devices from unverified sources.

India's Expanding Space Sector Offers Stellar ...

force. There is an official proposal by the Indian Air Force to be remained as "Indian Air and Space Forces," signalling a strategic shift, emphasising the critical role of space in national security. The IAF has clearly identified space as vital for both tactics and strategy, encompassing Intelligence, Surveillance and Reconnaissance (ISR) and Precision, Navigation and Timing (PNT), military communication, nuclear command and control, missile tracking, electronic warfare, battle management and training.

Future of India's Space Sector

India's trajectory in space exploration has taken a momentous leap with its ambitious Space Vision 2047 Roadmap, unveiled in 2023. This plan outlines a series of groundbreaking missions, transforming India into a formidable force in the global space arena. From flexible COMSATS by 2025 to space mining by 2047, India envisions a strategic roadmap that includes quantum and optical communications, a

human spaceflight programme, reusable heavy launchers, fully reusable vehicles, space-based strategic deterrence, manned lunar missions, interplanetary networks and space mining. The roadmap spanning 2025 to 2047 underscores India's commitment to advancing space tourism, global space data solutions and positioning itself as a global space manufacturing hub.

Furthermore, India has strategically realigned its international partnerships in the space sector including those with the United States and within the BRICS group. Joining the U.S.-initiated Artemis Accords, India emerged as the sole

signatory with lunar landing capabilities. The accord encompasses increased space co-operation, astronaut training, joint efforts with the International Space Station and strengthened commercial space ties.

India has also proposed the concept of a BRICS satellite constellation and space exploration consortium. Further commitments were made in a joint statement during the G-20 summit, establishing a working group for commercial space collaboration and advancing planetary defence.

India's newfound strategic clarity, as highlighted in the 2023

Space Policy and the Space Vision 2047 and the signing of the Artemis Accord, positions the country to bridge the gap with other space powers. This accelerated growth will require millions of highly skilled professionals, including scientists, engineers, astronomers, astronauts, astrophysicists and space entrepreneurs, to expand the horizons of the Indian space industry.

Coal India Limited (CIL), a 'Maharatna' Company is a prominent player in the global energy landscape with operations spanning across eight states of the country. During the year 2022-23, CIL produced 703 Million tons of coal, which is approximately 79% of India's total coal production. This resulted in profit of Rs. 28124 Crores (after Tax). CIL is also diversifying and expanding to other verticals such as solar power, thermal power, fertiliser, surface coal gasification, coal bed methane, critical minerals etc., which will ensure greater value addition; and thereby, improving operational and financial performance for the long-term in sustainable manner.

With a manpower of around 230000, CIL is one of the largest employer and it strive to make medical care accessible to all employees and its stake holders. Question: 'Career Calling' is a meticulously crafted book featuring articles from Employment News that provides career guidance to students and youth. Released at the New Delhi World Book Fair 2024, this collection offers invaluable career guidance for students and young professionals alike, emphasising the significance of informed decision-making in today's competitive landscape. How do you believe informed career choices can shape one's professional trajectory? Share your thoughts and experiences with us!

Arun B Asok

Kerala

Informed career choices is one of the most essential prerequisites for carving the future of any individual. Usually the children are forced to follow the path shown to them by their parents or elders around them and unfortunately the choices may not completely align with the talent of the individual. There is a saying, 'choose a job you love and you will never have to work a day in your life' because we all enjoy doing the things we like. So, introduction of a book like 'Career Calling' which explains indepth, the aptitude and other essential requirements about different career avenues including the contemporary as well as upcoming sectors, is like opening a door of immense opportunities that enables young minds to think and decide the most suitable avenue that they will cherish to follow as their career. It is a welcome move to make people aware of the latest opportunities that appear in emerging fields such as Information Technology, Green Technology etc. Now it is the responsibility of educational institutions to make their students access the books such as 'Career Calling' thereby giving them the awareness in the field. If the libraries have ample stock of the book, it will also amplify the awareness. It will enable students to find their passion and follow path to be a genius in the field, rather than following a path shown to him or her by a person whose passion is entirely different.

Four Air Force Units Decorated with President's Standard and Colours

President Smt. Droupadi Murmu presented the President's Standard to the 45 Squadron and the 221 Squadron and the President's Colours to the 11 Base Repair Depot and the 509 Signal Unit of the Indian Air Force on March 8, 2024. This was the first time in the history of the IAF that four units were awarded President's Standard

and Colours together. The President's Standard and Colours is the highest military honour for any armed forces unit. The four units selected for the coveted awards have stellar contributions to the IAF's history.

President Honors Outstanding Artists with Sangeet Natak Akademi Fellowships & Awards

President Smt. Droupadi Murmu has bestowed the Sangeet Natak Akademi Awards for the years 2022 and 2023 upon 94 distinguished artists, including two joint awardees, for excellence in performing arts. The special investiture ceremony on March 6, 2024, witnessed the recognition of the artists' exceptional contributions to Indian culture. In addition to the Akademi Awards, the President presented the Sangeet Natak Akademi Fellowship to six eminent artists. In her speech, the President praised Indian art as a powerful expression of the country's soft power.

NITI Aayog and Meta Collaborate to Launch Frontier Technology Labs in Schools

NITI Aayog and American multinational technology conglomerate Meta have joined forces to introduce Frontier Technology Labs (FTLs) in strategically important schools in India; ensuring students from diverse backgrounds have equal opportunities to engage with cutting-edge technologies. FTLs will be equipped with state-of-the-art infrastructure to empower students to innovate using technologies like Artificial Intelligence, Augmented & Virtual Reality, Blockchain, Cybersecurity, Robotics, 3D Printing and the Internet of Things.

Indian Navy Strengthens its Foothold in Lakshadweep with INS Jatayu

The Indian Navy has commissioned INS Jatayu at Minicoy Island in Lakshadweep on March 6, 2024. The commissioning of INS Jatayu, the Indian Navy's second base in Lakshadweep, enhances India's surveillance posture in the strategically located islands and critical sea lanes of communication. It is also set to augment connectivity with the mainland and contribute to the comprehensive development of the islands. Following the commissioning, the Maritime Operations Center at Minicoy was inaugurated. INS Jatayu will be functioning under the operational control of Naval Officer in Charge (Lakshadweep), Southern Naval Command.

Celebrities, Influencers to be Booked for Endorsing Illegal Betting and Gambling

The Central Consumer Protection Authority (CCPA) has issued a comprehensive advisory, aligning with the Consumer Protection Act, 2019, against advertisements promoting betting and gambling. Strictly prohibited under the Public Gambling Act, 1867, betting and gambling remain illegal in most regions across the country. Despite this, online platforms persist in advertising these activities directly and, at times, under the guise of gaming. The advisory cautions that strict action will be initiated against all involved parties, including manufacturers, advertisers, publishers, intermediaries, social media platforms, endorsers including celebrities and social media influencers and other relevant stakeholders if they are found engaging in the promotion or advertisement of online gambling and betting.

New Wildlife Protection Rules Mandate Registration for Possession of Exotic Animals

Any Indian in possession of exotic wild species will now have to adhere to newly enforced rules notified under Section 49M of the Wild Life (Protection) Act, 1972. This marks a crucial step in monitoring the possession and breeding of highly endangered exotic wild animals in captivity. Under the new rules, individuals

possessing living specimens of exotic animal species must apply for registration within six months of the rules' commencement (1st April 2024). These species are listed in the Appendices of Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES) and Schedule IV of the Wild Life (Protection) Act, 1972.

Singapore to Raise Salary Criteria for Foreigners Seeking Employment Pass

Singapore has announced that the country is set to raise the salary criteria for foreign executives and professionals that companies can hire. Starting January 2025, foreigners seeking employment passes, typically reserved for well-paid professionals, will need to earn at least 5,600 Singapore dollars per month, an increase from the current requirement of 5,000 Singapore dollars. The manpower ministry said the move is aimed at ensuring that the employment pass holders are of high quality. The Southeast Asian financial hub has been a favoured choice for foreign companies to establish their regional headquarters.
